Signalz Tutoring Referral

THE UNIVERSITY OF ARIZONA GLOBAL CAMPUS Library

What is Signalz?

Signalz is an application within the Canvas classroom that allows instructors to communicate with and encourage their students. One way to use Signalz is to refer students to tutoring. Below are directions on how to refer a student to tutoring.

How to Refer a Student to Tutoring via Signalz

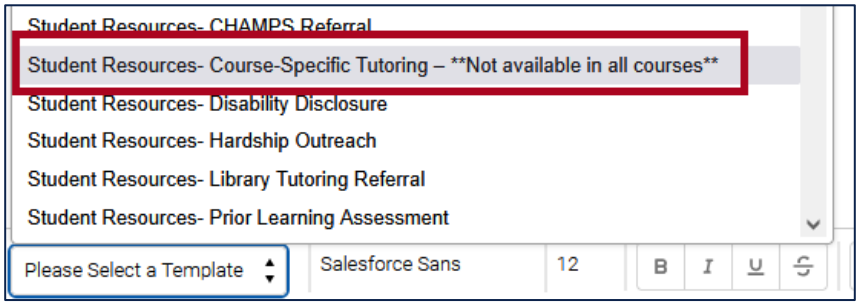

1. Select the **Signalz** link in the lefthand navigation menu in your Canvas classroom.

2. Scroll down to view the list of currently enrolled students and select the **envelope** icon next to the student's name you are sending the referral to.

3. Select a **Template** from the drop-down menu that fits the student's tutoring needs. For example, use the **Student Resources – Course-Specific Tutoring** template to direct them to subject tutoring. Customize the email as you wish then select send.
